

Why choose Euclid® Medical Product's packaging equipment?

- Thermal Transfer Printing for Permanent Printing on material (will not fade)
- Class "A" Packages/Enclosures
- Servo Motor for precision packages...very critical when running 2D barcodes
- One piece cast aluminum frame for stability and durability
- High Resolution 300 dpi printing for sharp text and barcodes
- Fingerprint Scanning for user login
- Pill Camera for visual verification of the proper medication
- Ability to print linear and 2D barcodes
- You can print your corporate logo on the package
- Uses Windows true type fonts which allows for many different fonts
- Automatic Tallman lettering as recommended by ISMP
- Material sensors monitor all supplies to prevent outage and rethreading
- Reports may be customized to your needs
- User settings for control of access to all areas of the software
- 1 year parts and labor in plant warranty
- On-site service and ongoing technical support included
- On-site maintenance and training review available
- Built to last ... many machines over 20 years old are still in use
- Choice of stainless or Teflon table tops
- Auto cut-off options available for The Cadet®, Cadet Twin®, and Cadet Twin®2x2
- All machines are made in house for faster lead times
